- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s). \_\_\_\_\_ 6) ☐ Other:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, 29-30 drawn to a method for differentiating, classified in class 435, subclass 19.
- 5 II. Claims 9-20, drawn to a device for differentiating, classified in class 435, subclass 287.1.
- III. Claims 21-28, drawn to a device for collecting nasal secretions, classified in class 215, subclass 259.
- 10 IV. Claim 31, drawn to a kit, classified in class 435, subclass 975.

The inventions are distinct, each from the other because:

15 Inventions I and II, III, IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this  
20 case the devices could be employed for other functions such as determining other types of specimens such as lung expectorate.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has  
5 separate utility such as collecting other types of specimens. See MPEP § 806.05(d).

Inventions II and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to  
10 be separately usable. In the instant case, invention IV has separate utility such as employing other types of devices than those of Group II. See MPEP § 806.05(d).

Inventions III and IV are related as subcombinations disclosed as usable together in a single combination. The  
15 subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention IV has separate utility such as employing other types of devices than those of Group II. See MPEP § 806.05(d).

20 Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5 Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must  
10 be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
